The owners MOFT are well-educated professionals with individualized experience that includes starting, running and selling several successful businesses. The team is now in the process of developing a long-term, sustainable, two-fold business that will not only aid in the Technology, but will provide proper situation both in real and virtual world.

MOTF Tokenomics

Fees

MOTF token is a reflection token.

A reflection token is a token that rewards holders through a fee (tax) on each transaction. Our token will automatically send MOTF to holder's wallets periodically based on the trading volume of the MOTF Token, all completed by our rewards system smart contract.

2% of the tax on buy/sell orders gets added to the rewards pool.

Hold MOTF Token and get automatic rewards directly to your wallet!

3% of buys and sells gets added to the liquidity on PancakeSwap.

This liquidity becomes locked away and inaccessible, once again raising the price floor each time a transaction is made. In addition, by adding to the liquidity pool the price will see more stability and holders will be able to access their funds easily.

2% of the value of all buys and sells is sent to the marketing fund.

This will allow the team to attract more investors from around the world. More volume

ensures the rewards pool is sustainable and able to grow.

This will be changed to 0% when platform is fully launched.
